# Supporting independent futures

## About St Martins

St Martins is a leading provider of care and accommodation in London to adult men with complex mental health needs. We have been delivering positive outcomes for people with or without forensic backgrounds at our care homes since 1980.

We work in partnership with care teams, the NHS, local authorities, clients and their advocates to help each individual achieve their maximum potential and gain as much independence as possible.

Experienced staff provide support 24 hours a day; including assessments, recovery plans, one-to-one keywork sessions, assistance with medication, help accessing benefits, compliance with MoJ restrictions and whatever else residents of our care homes require to lead the best and safest life possible in the community.

## Our assessment service

### Professional assessments

We have been carrying out mental health assessments since 1980. Our staff have in-depth experience of working with clients with the full range of diagnoses and needs associated with forensic backgrounds and long term institutionalisation. Assessments are conducted by senior staff who make recommendations based on extensive knowledge of the mental health and criminal justice systems, as well as their own experience in working with this vulnerable client group.

## Flexibility, efficiency, impartiality & fees

### Flexibility and efficiency

We offer a flexible assessment service, ensuring that we meet clients as soon as possible in a location that they are comfortable with.

### Assessment reports

We will deliver a comprehensive report within 5 working days of the assessment being carried out.

### Impartiality and recommendations

While we may make recommendations that a client could be placed at one of St Martin's care homes, where this may be appropriate, we will maintain impartiality when it comes to recommending care providers. We will always provide recommendations based on what services our assessors judge the most appropriate for the wellbeing of the client.

### What we require to carry out assessments

- A clients' most recent CPA report.
- Details of any CTOs and MoJ restriction orders.
- A full and up-to-date risk assessment.

### Fees

- Our assessment fee starts at £200 per client.
- The senior staff who carry out assessments are based in London and their travel expenses will be added to the assessment fee.
